

Hello,

I subscribe to XM and benefit from listening to their instant traffic and weather. Satellite Radio provides variety and quality that is not found on regular radio that is why I pay for the service. It should not be up to the National Association of Broadcasters to dictate what I am permitted to hear on my satellite radio. I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve.

Sean Whitmore
